

# LOOKING TO DEVELOP YOUR CAREER?

## BAY AUDIOLOGY DESERVES A HEARING.

New Zealand's largest audiology provider can offer you some pretty big incentives to take your career to the next level.

If you're inspired by best clinical practice, you'll be reassured to know that we are too. Our regional managers are all experienced audiologists who know what it's like to take a wary 60 year-old through the process of getting their first hearing aid. Because our managers understand the science and clinical issues, you'll benefit from the first-rate facilities to deal with them.

We'll help you keep up with the pace of changes in the field, with ongoing training and educational grants to fine-tune your skills. Our size, experience and extensive resources mean our clinics are resilient to an ever-changing market. And because we have dedicated staff at our support office taking care of the admin and marketing for each of our clinics, you'll be free to concentrate on taking care of your patients.

We are passionate about developing and encouraging young talent in our industry, so are more than happy to speak to people just starting out. With over 60 locations in NZ, we can offer great supervision and work experience options for new graduates, who want to launch their careers with a stable and progressive business.

### THESE OPPORTUNITIES ARE AVAILABLE NOW.

#### WHANGAREI. NORTH ISLAND

Bay Audiology Whangarei is moving premises and looking for a brand new team. If the thought of a sunny, outdoors lifestyle in the Upper North Island appeals to you, give us a call today. We are keen to speak to a CCC Audiologist or those looking to make the step up to that level.

#### WANGANUI.

A position for a CCC Audiologist has opened up at Bay Audiology Wanganui, a clinic with a great standing in the local community. In the past, this busy clinic has supported two clinicians so we would consider an Audiometrist for one of the roles.

#### RICHMOND. SOUTH ISLAND

Based in a very sought after place to live, at the top of the South Island, this clinic is looking for additional support from a CCC Audiologist or Audiometrist to deal with the high volume of clients transferring from Nelson. Those preferring part-time hours will be considered also.

#### TIMARU.

An opportunity is available in this great location for a clinician wanting to take charge of this clinic and its steady client base.
